

CONTRACT INSPECTION

CONTRACT INSPECTION SERVICES

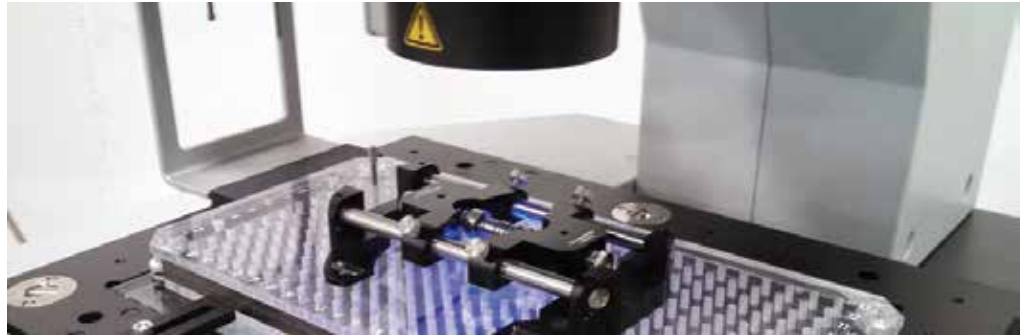

Contract Inspection is an essential process to ensure that all of your equipment is in perfect working order and to maintain quality qualifications and standards. Upon completion of our inspection process, PrymeTech will provide a certificate for the inspected parts.

PART INSPECTION

Accuracy is of the upmost importance. Our inspection team has decades of experience in dimensional measurement in a variety of industries. Our temperature-controlled facility allows us access to some of the most advanced tools available to ensure you get the most accurate results. In-house, we have CMM's, multi-sensors, comparators, and a variety of hand tools and scanners that allow us to accurately measure any part.

Contract Inspection Services:

- First Article Inspection
- PPAP Services
- Sorting
- Mold Verification
- Bottleneck Relief
- Reverse Engineering

STATISTICS & ANALYSIS

Statistical Process Control (SPC) is a method of quality control which employs statistical methods to monitor and control your processes. This helps ensure that the process operates efficiently, producing more specification-conforming products with less waste.

Gage Repeatability & Reproducibility (GRR) is the process used to evaluate a gauging instrument's accuracy by ensuring its measurements are repeatable and reproducible.
